**Motion by** Corrion second by Willenberg to approve the December 6, 2024 minutes. All ayes, **motion carried.**

**Reports:** Hartz reported that the tower inspection with Dixon Engineering resulted in a recommendation to overcoat the tower within two years, waiting longer than that could result in more maintenance and testing in the future. Hartz received an email that the EPA study has been temporarily suspended. His hope is that will not last long and the study will resume. Hartz will be meeting with EGLE in February to discuss options on treating the manganese in the water. EGLE has asked the water plant to start in house weekly sampling, which they have just began and will be sending into the state for results.
